Welcome to Quarter Distribution!

We live skateboarding and therefore best quality and service is our priority. Quarter Distribution & Production has been active in the board sport sector for over a decade and is now one of Europe's leading companies in this field. With our staff of over 20 people we produce over 100.000 boards per year in our manufacturing facility in Rüdersdorf near Berlin.

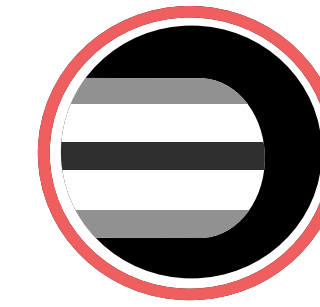

Our decks

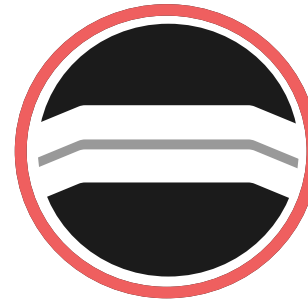

SUPERPLY stands for premium skateboard decks made out of 7 plies Canadian hardrock maple from sustainably managed forests pressed one by one with epoxy resin glue.

100 % Best Canadian maple

Decks come with 3 dyed veneers

Single pressed

Water-based, environmentally friendly prints

US Epoxy glue

Multiple quality checks during production

Forest Stewardship Council compliant

Veneer colors

custom veneer colors are available for higher quantities.

Center veneer color depends on the kind of deck

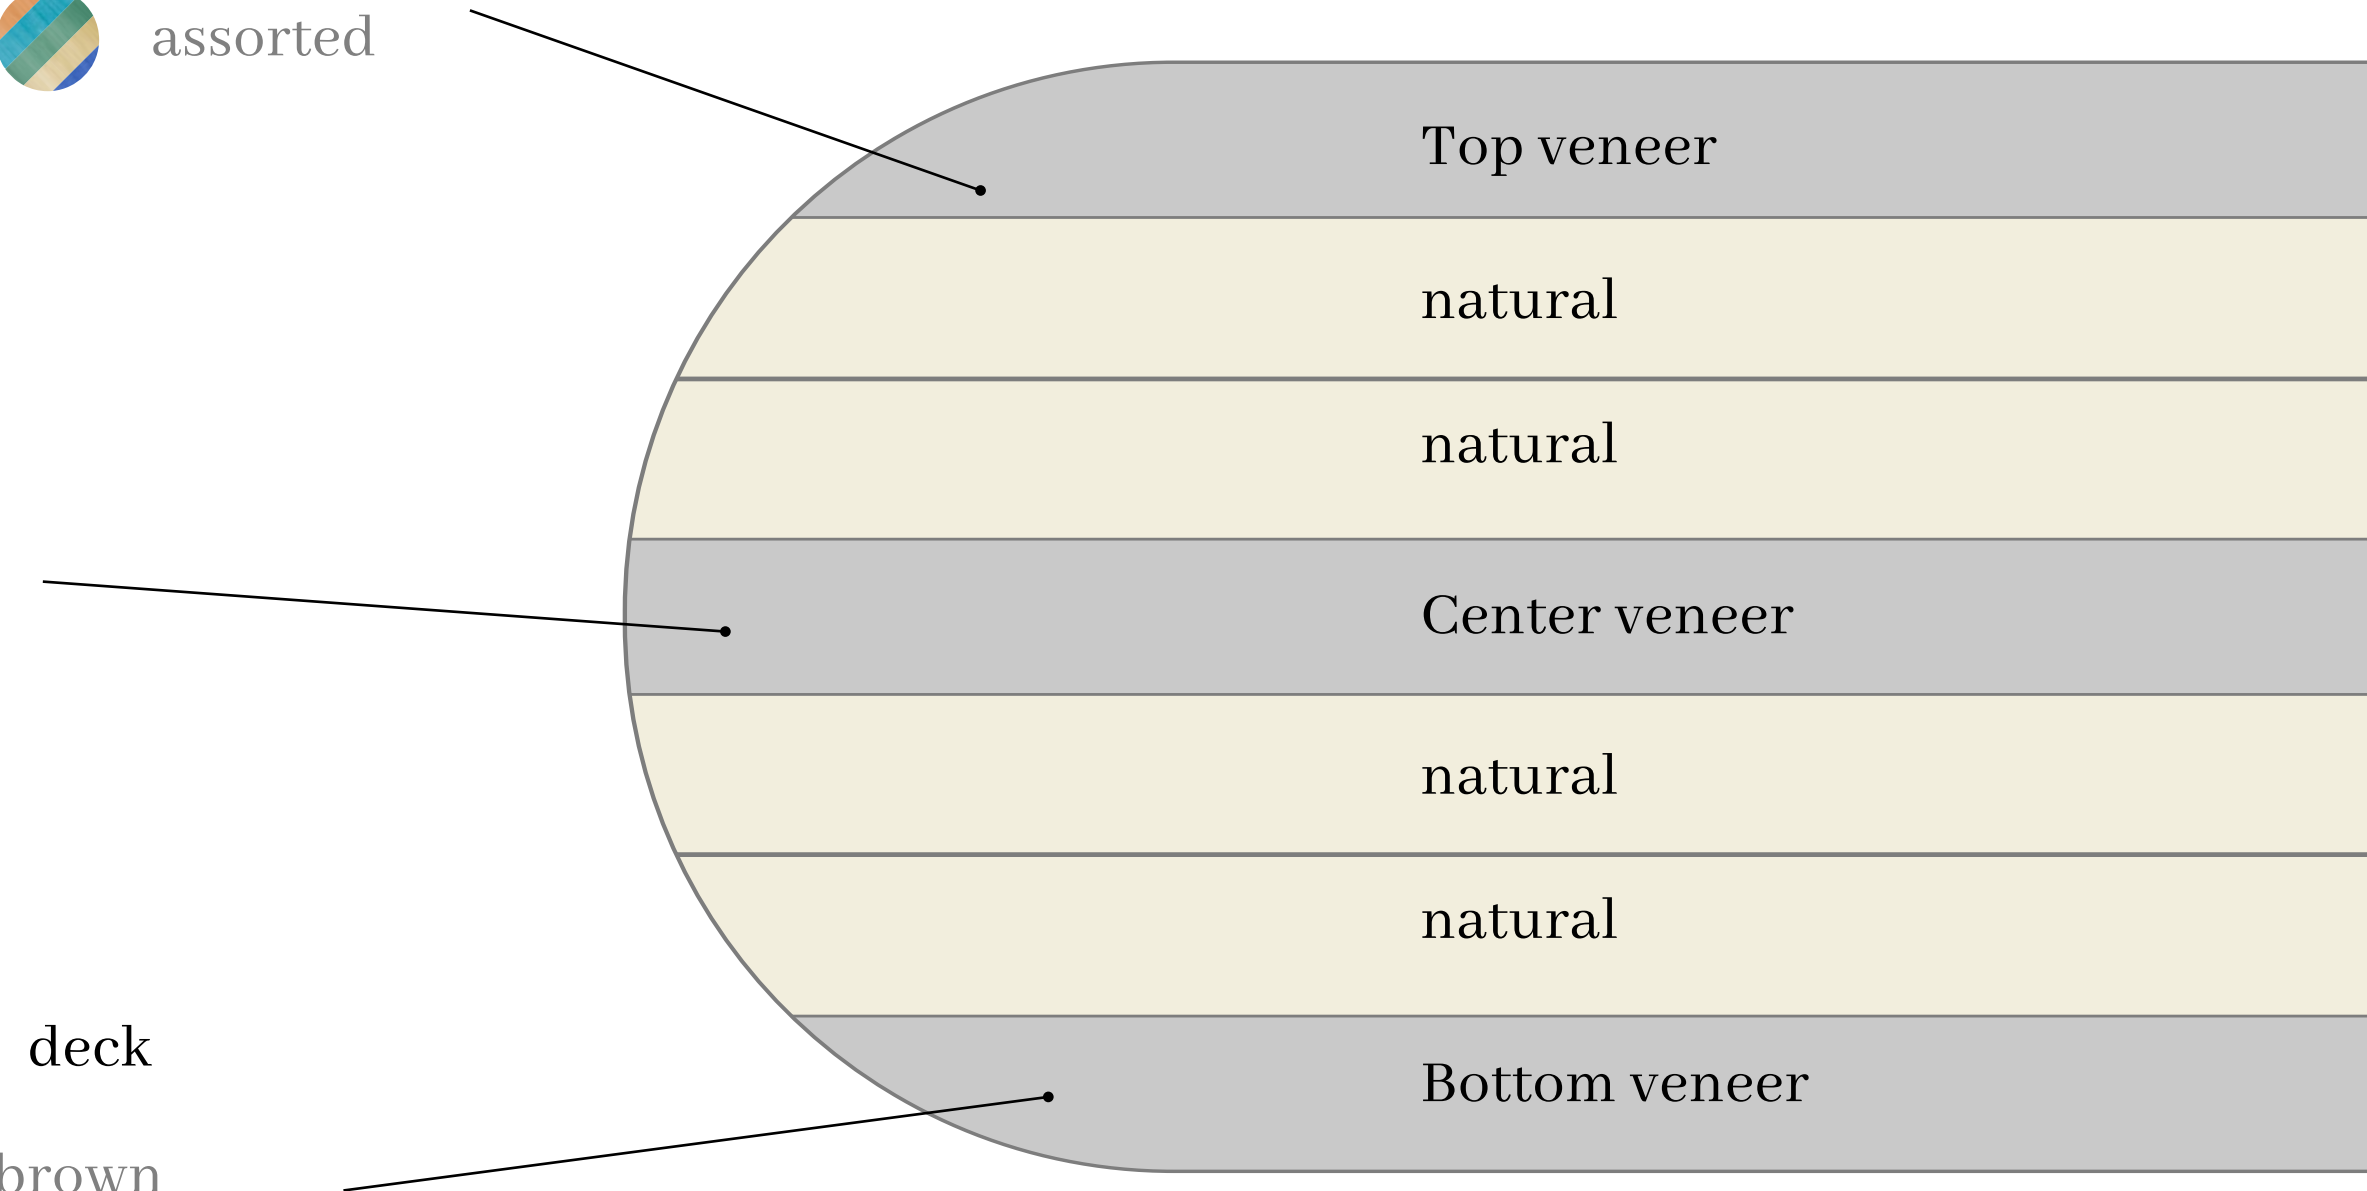

- | | | |
|---------------------------------|--------------------------|------------------------|
| <u>Popsicles medium concave</u> | <u>Flat bottom decks</u> | <u>Twin tail decks</u> |
| <u>Popsicles deep concave</u> | <u>Square tail decks</u> | <u>Special shapes</u> |

Bottom veneer color depends on the size of the deck

- | | | | | |
|---------|--------|--------|------------|-------|
| natural | yellow | pink | light blue | brown |
| | orange | purple | green | grey |
| | red | blue | lime green | black |

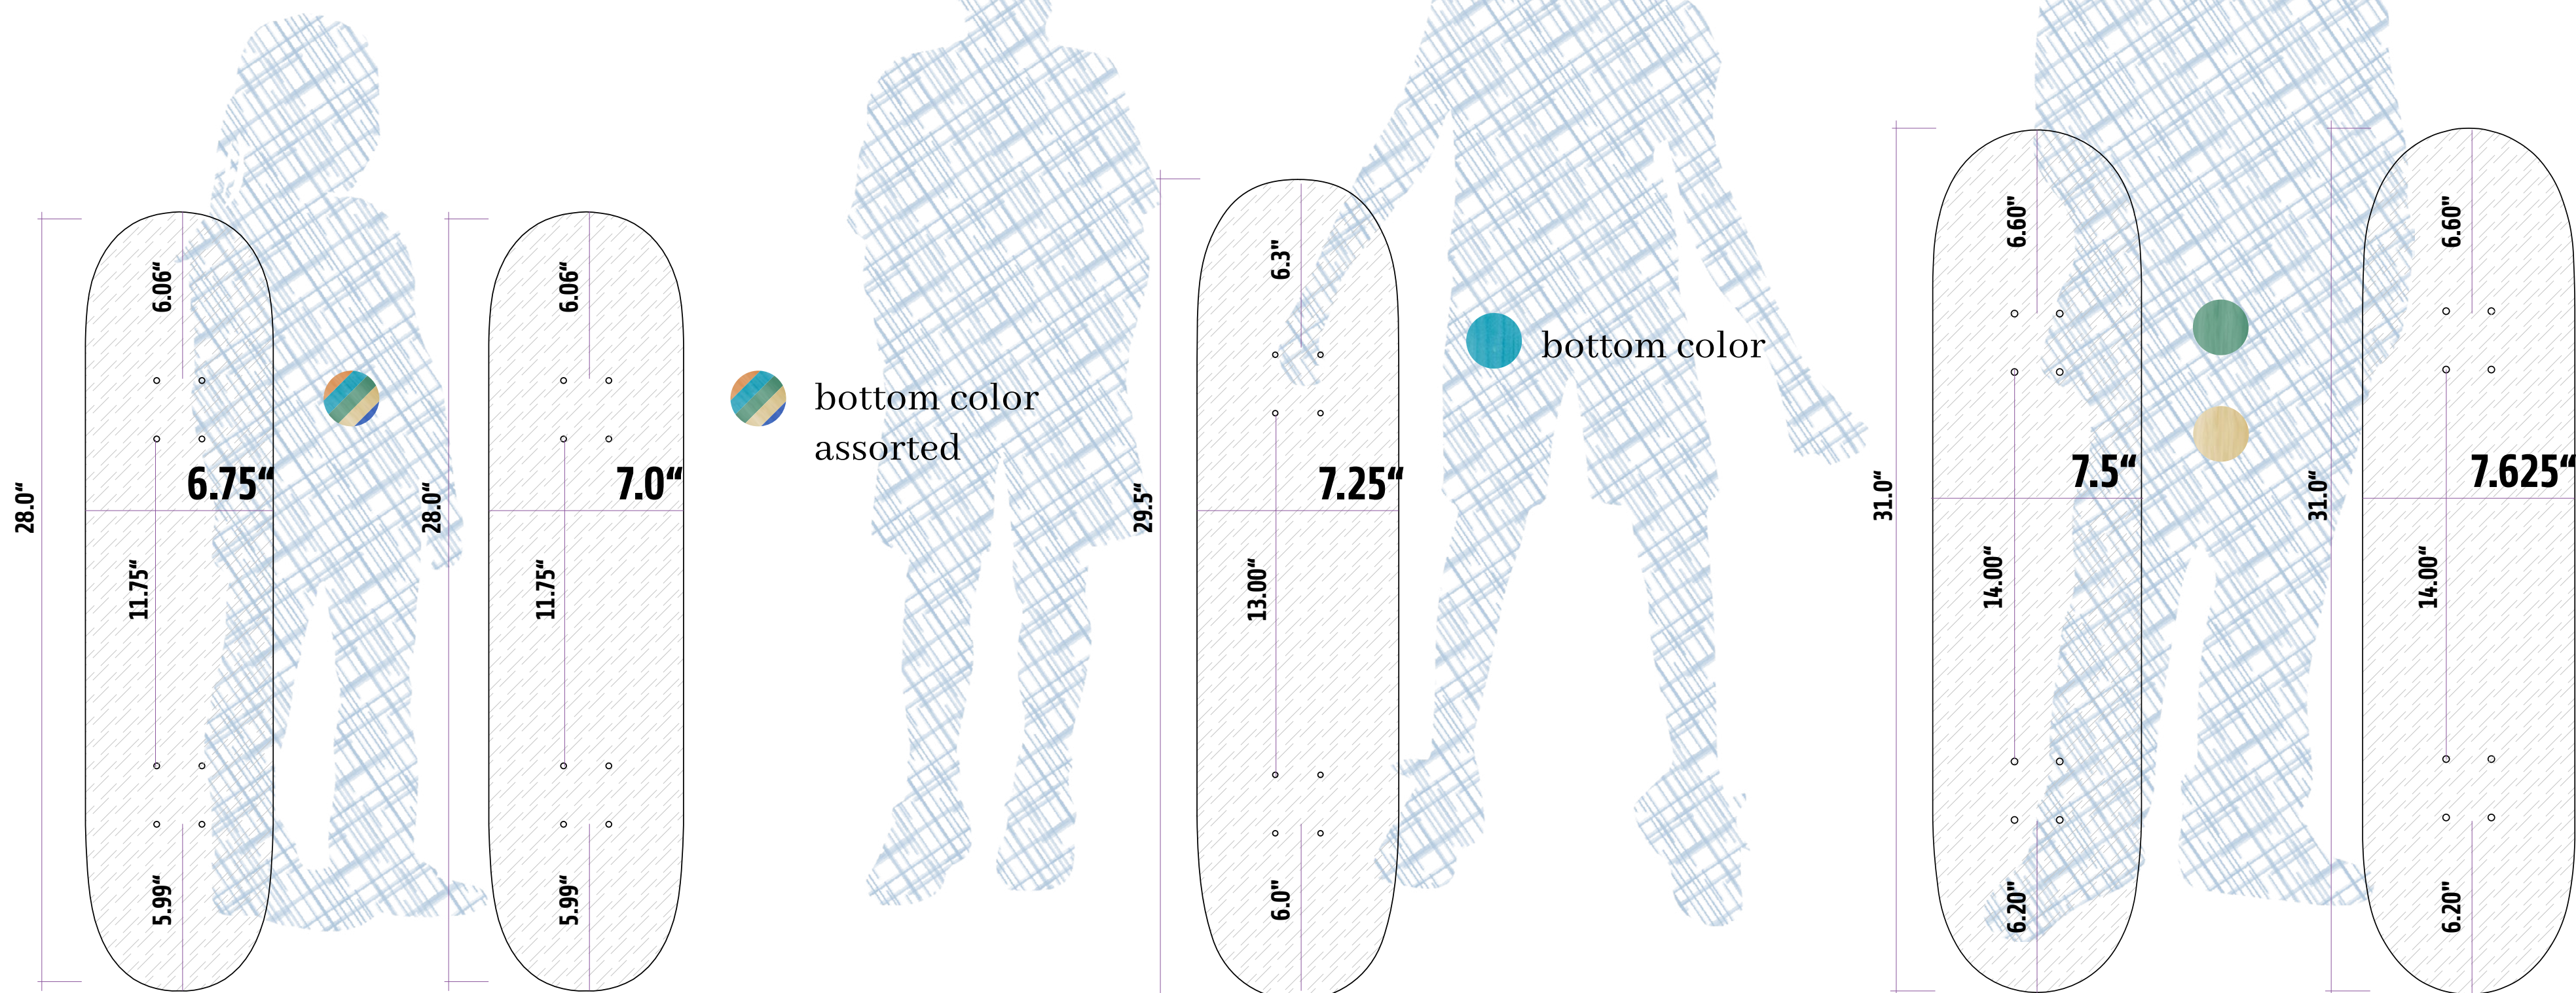

Top veneer colors

- assorted

Kids sizes

We have 5 different sizes especially for the young ones between 5 and 13 years old.

revised deck dimensions

Posicles Specs

Our popsicles are modern contemporary decks and are available in medium or deep concave.

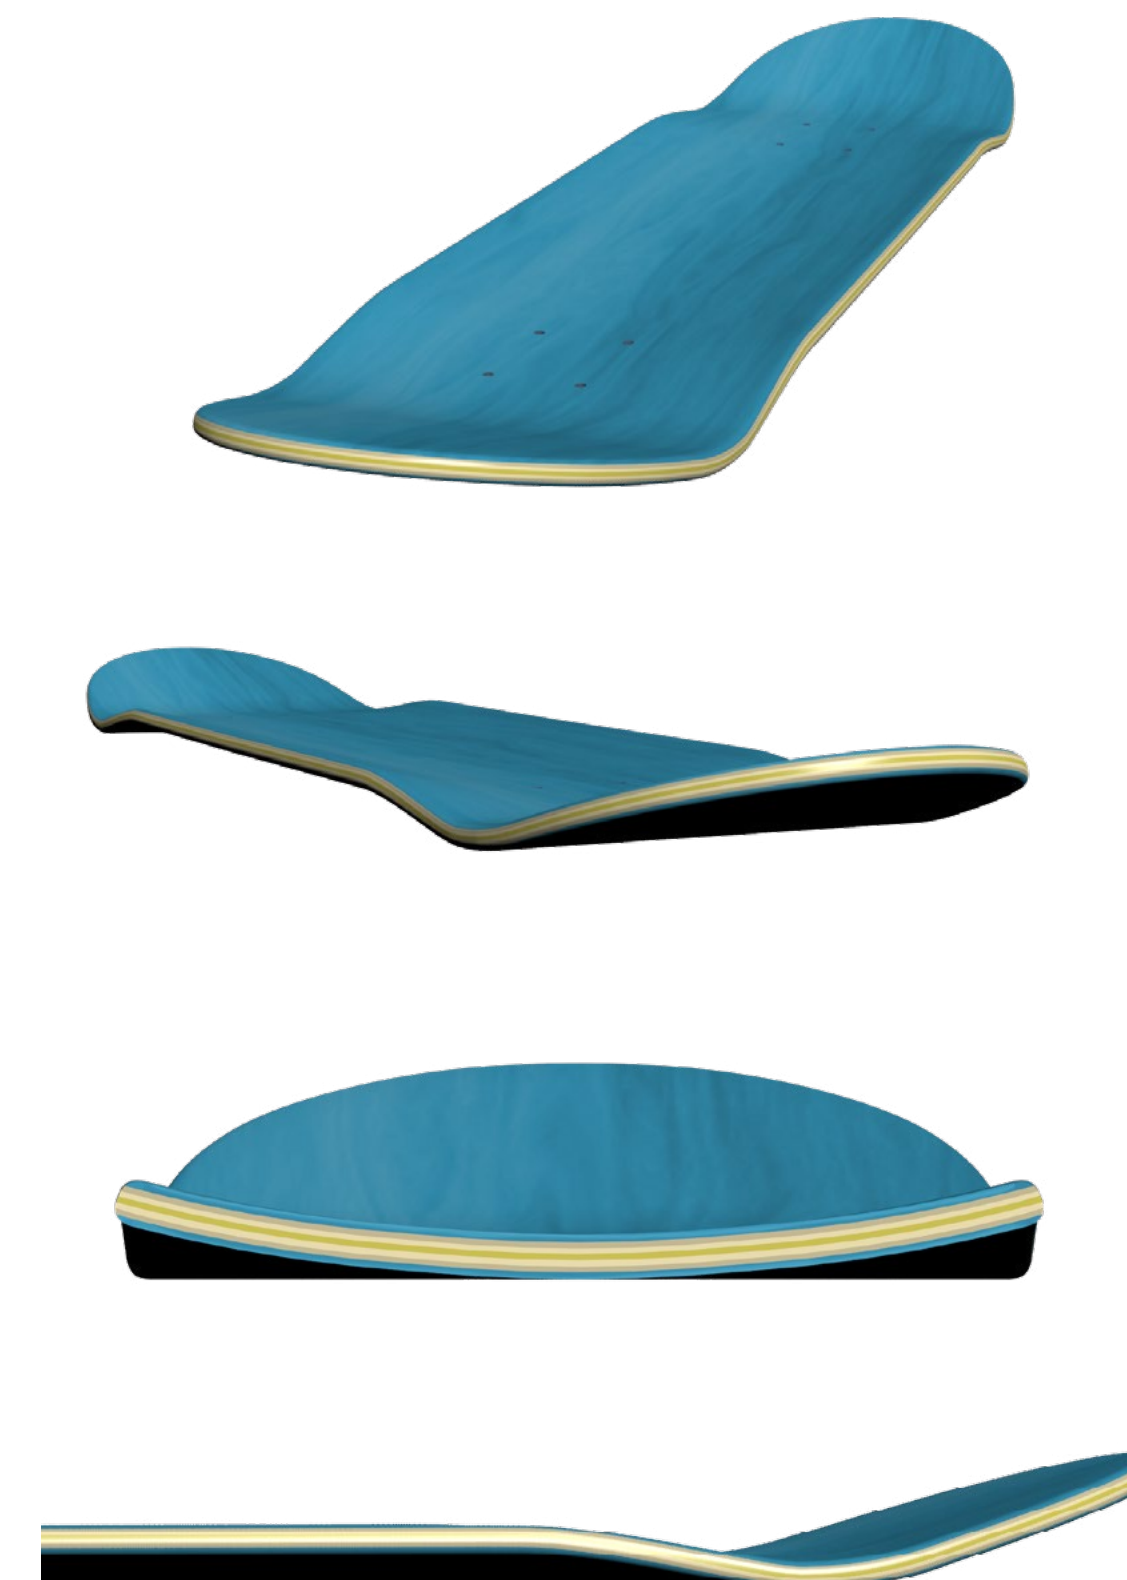

The elegant look of this decks comes from its narrow kick radii which give the deck distinct pockets and a well defined finger of flat area. This can be achieved only with single pressed decks by high pressure hydrolic machines.

medium concave (red center veneer)

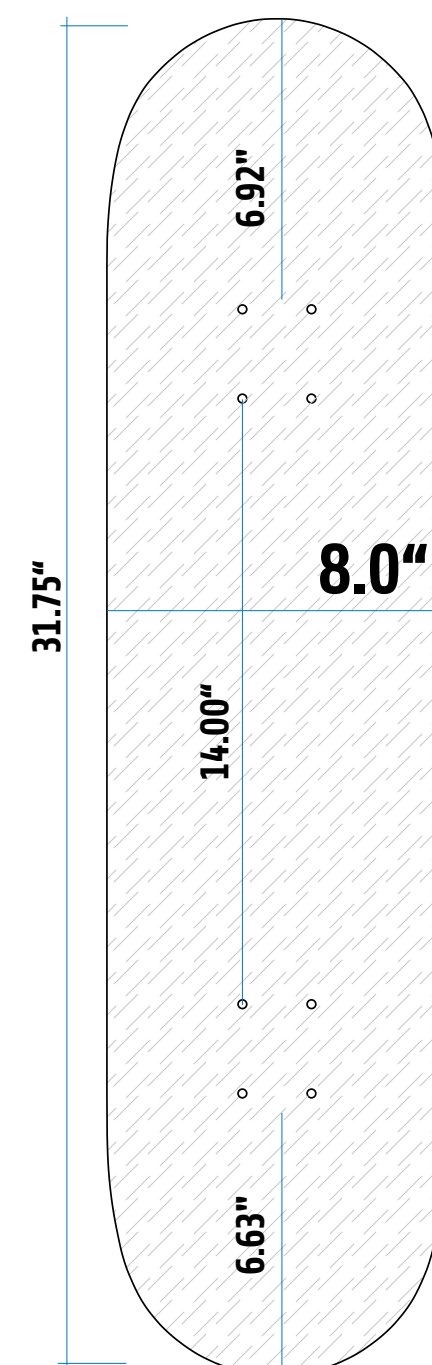

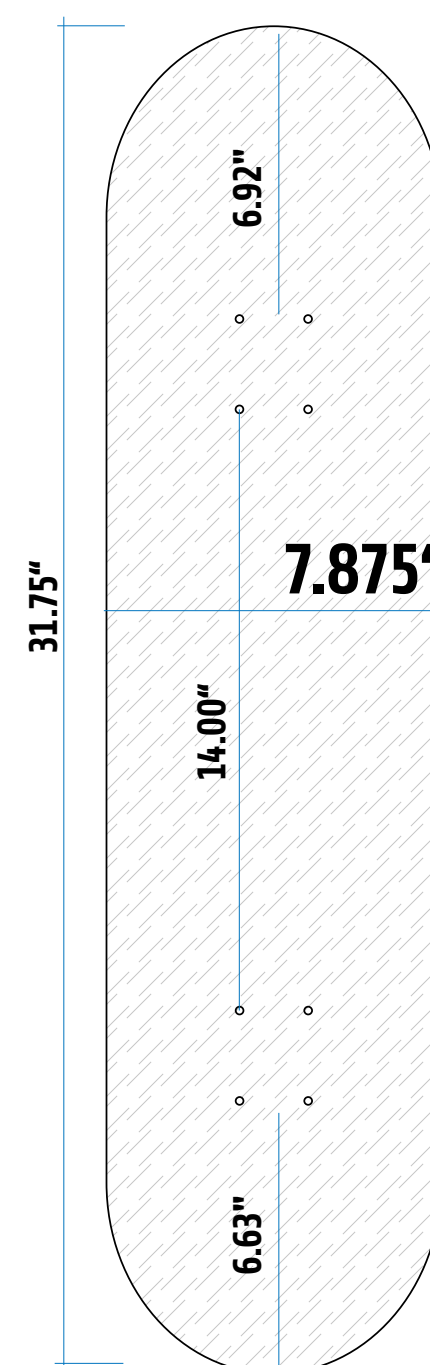

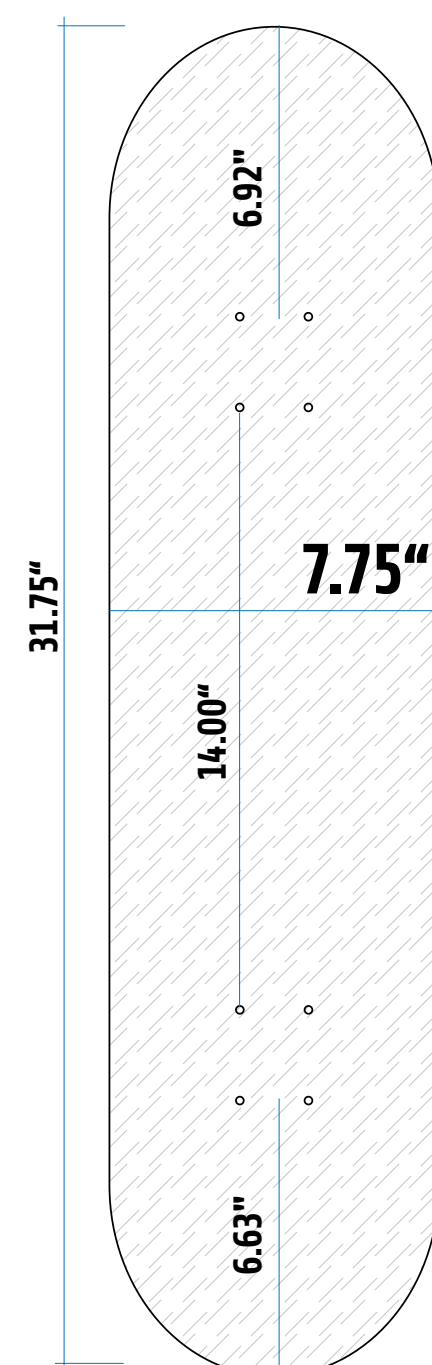

deep concave (yellow center veneer)

Popsicles

The narrow sizes have been very popular in the 90s era. They can also be perfect for skaters with smaller body height.

Popsicles

The deck sizes 8.125" to 8.5" are the most popular ones today.

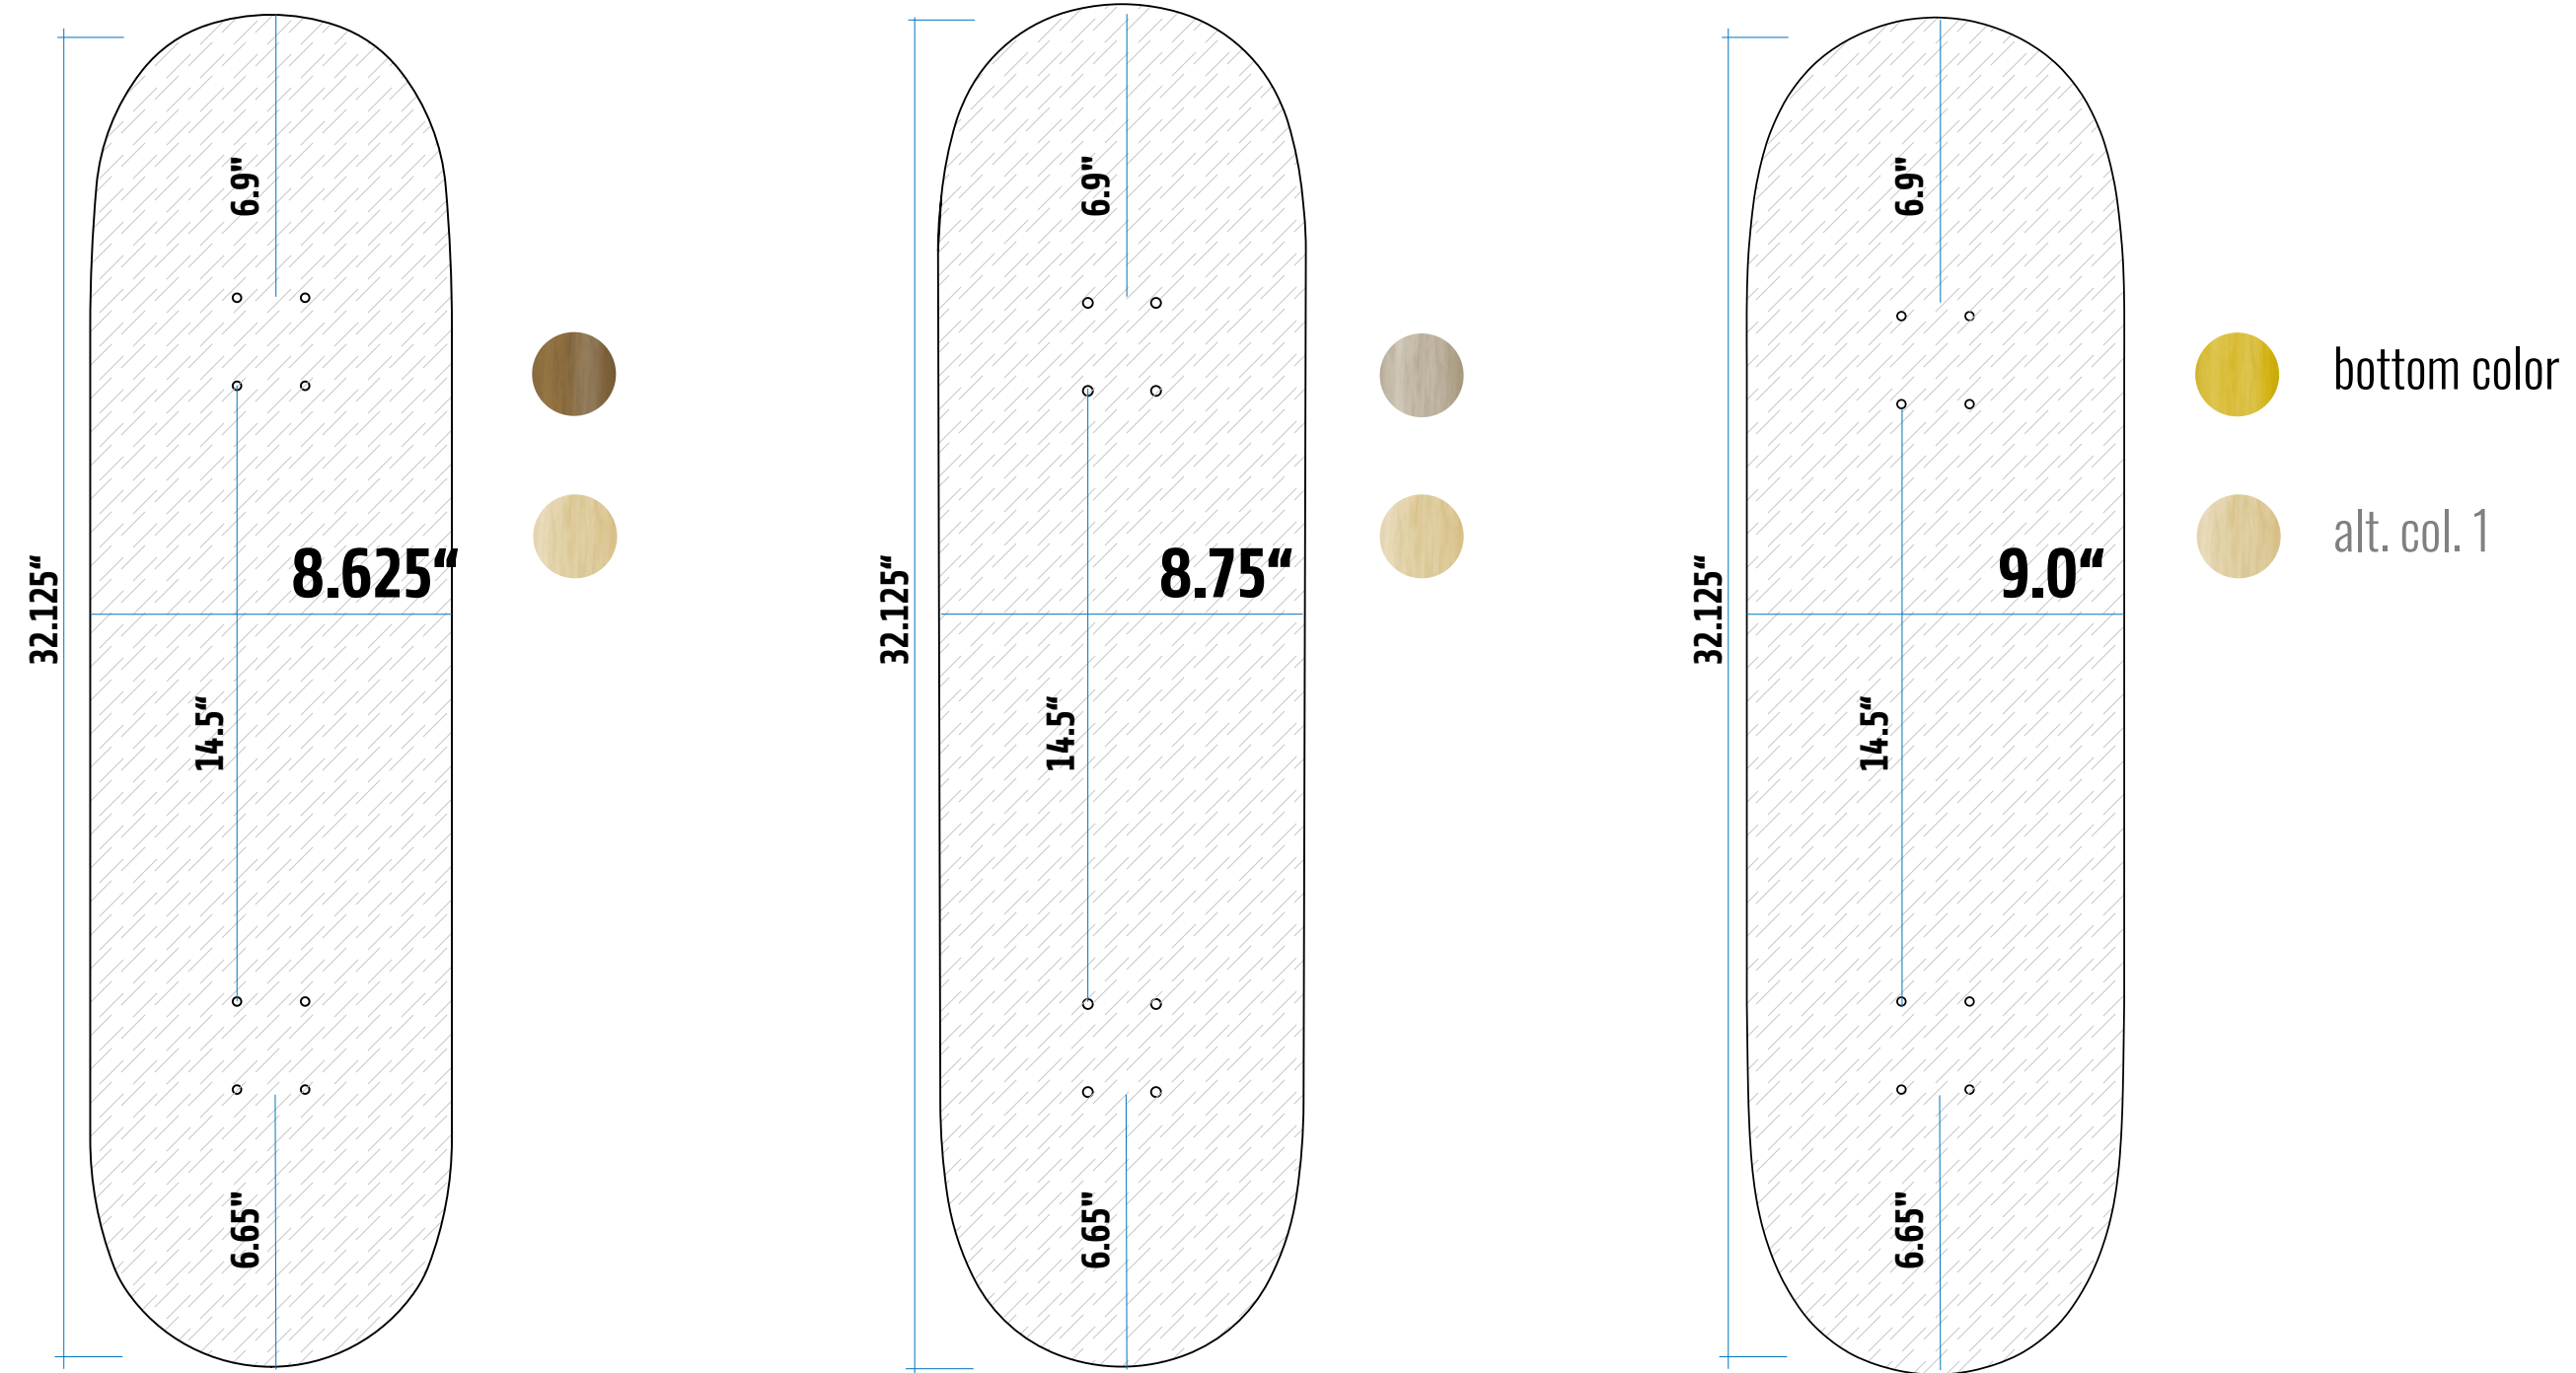

8.125 - 8.5"

Popsicles

We also have big deck sizes in our product range. They are available in medium concave.

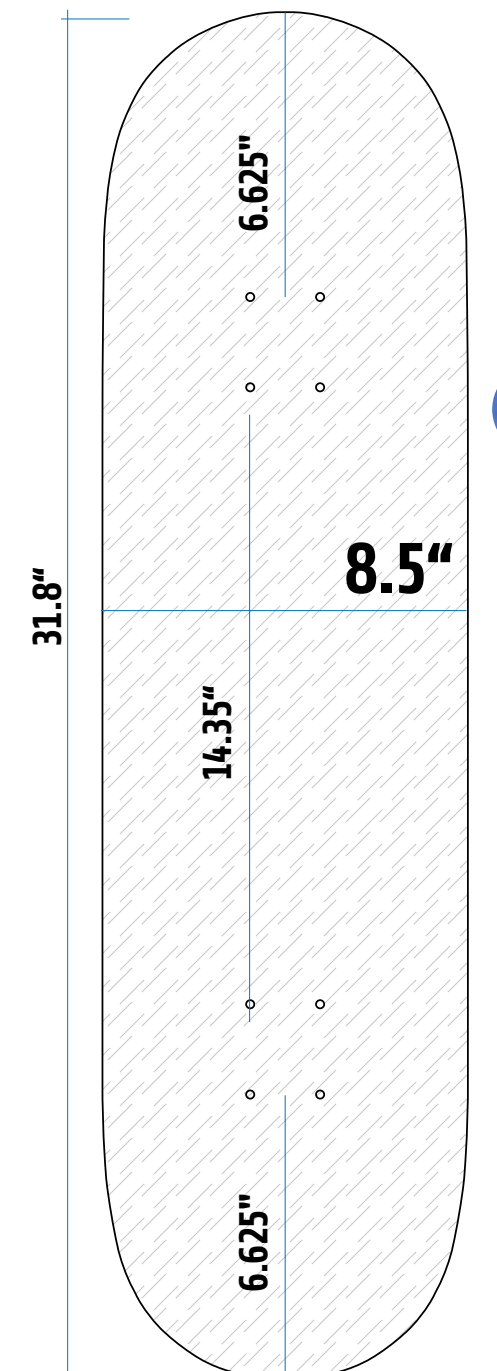

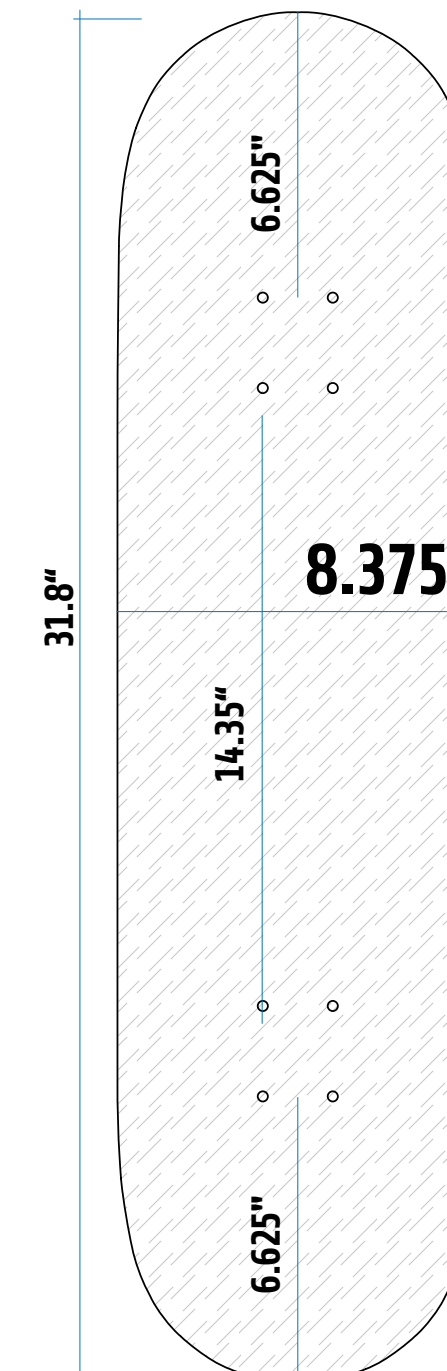

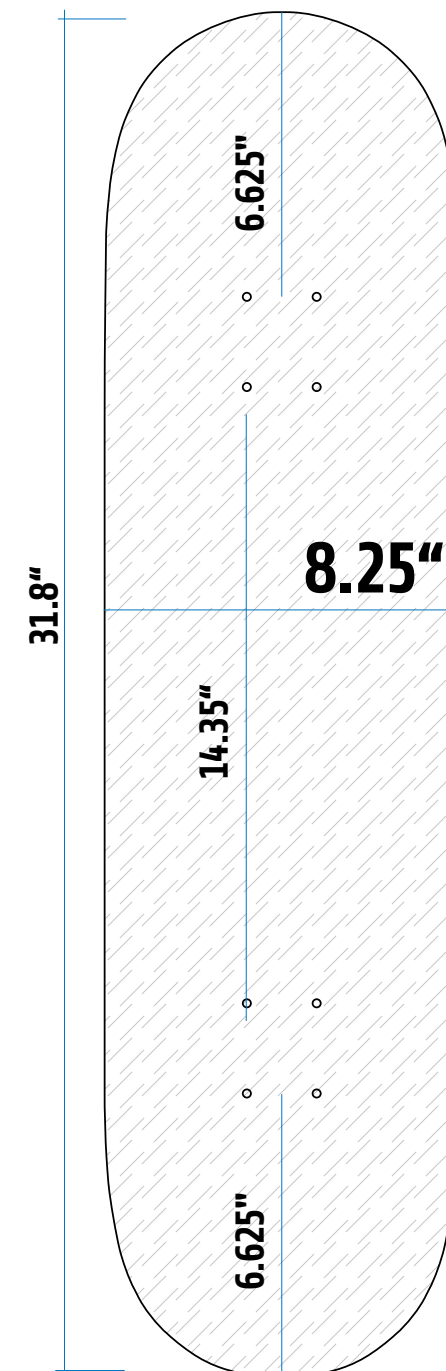

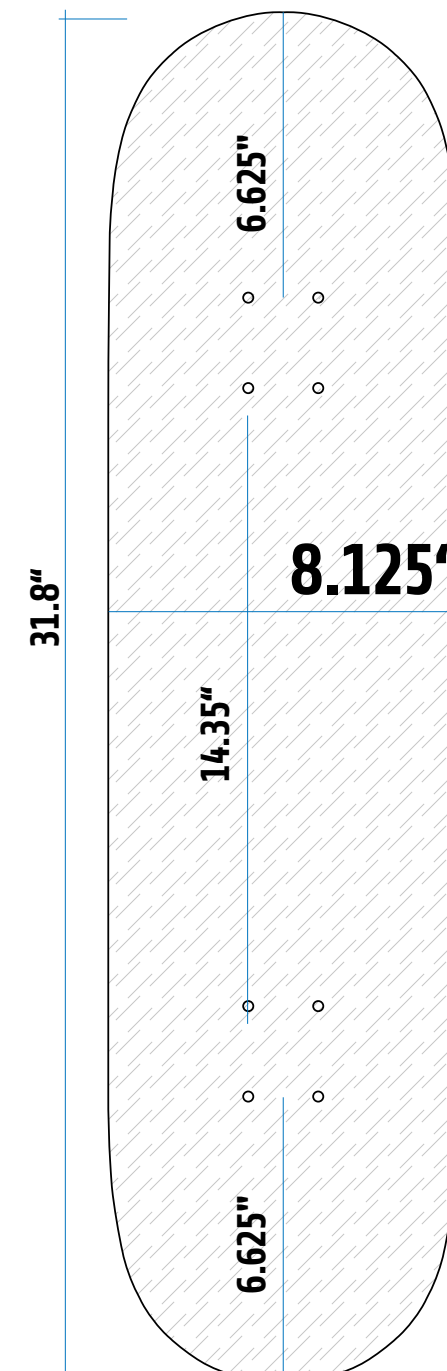

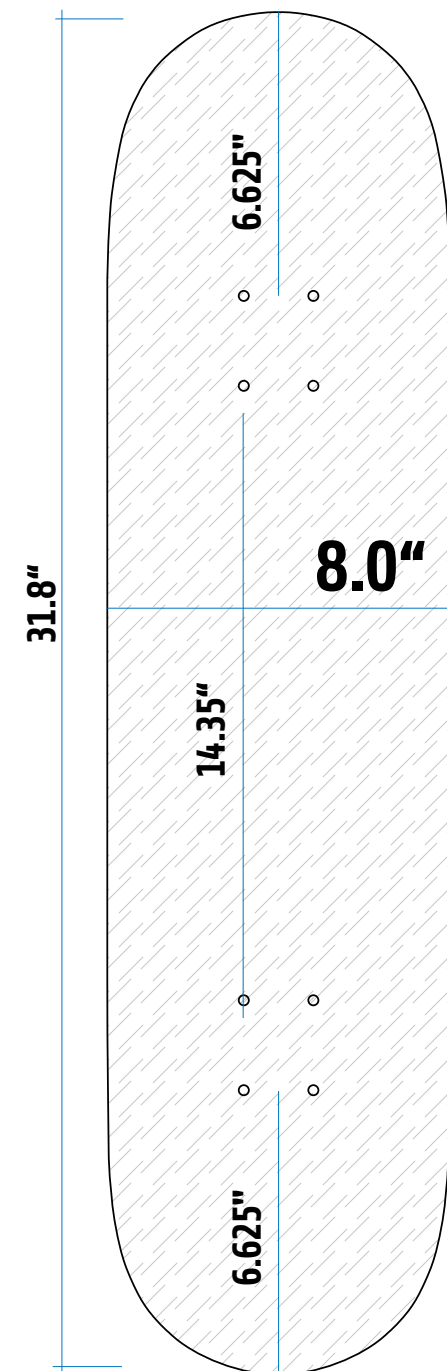

8.625 - 9.0"

Twin tail decks

As the name indicates the Twin tail decks are symmetrical decks. They are derived from our deep concave popsicle decks and have the same distinct pockets and finger of flat.

8.0 - 8.5"

Square tail decks

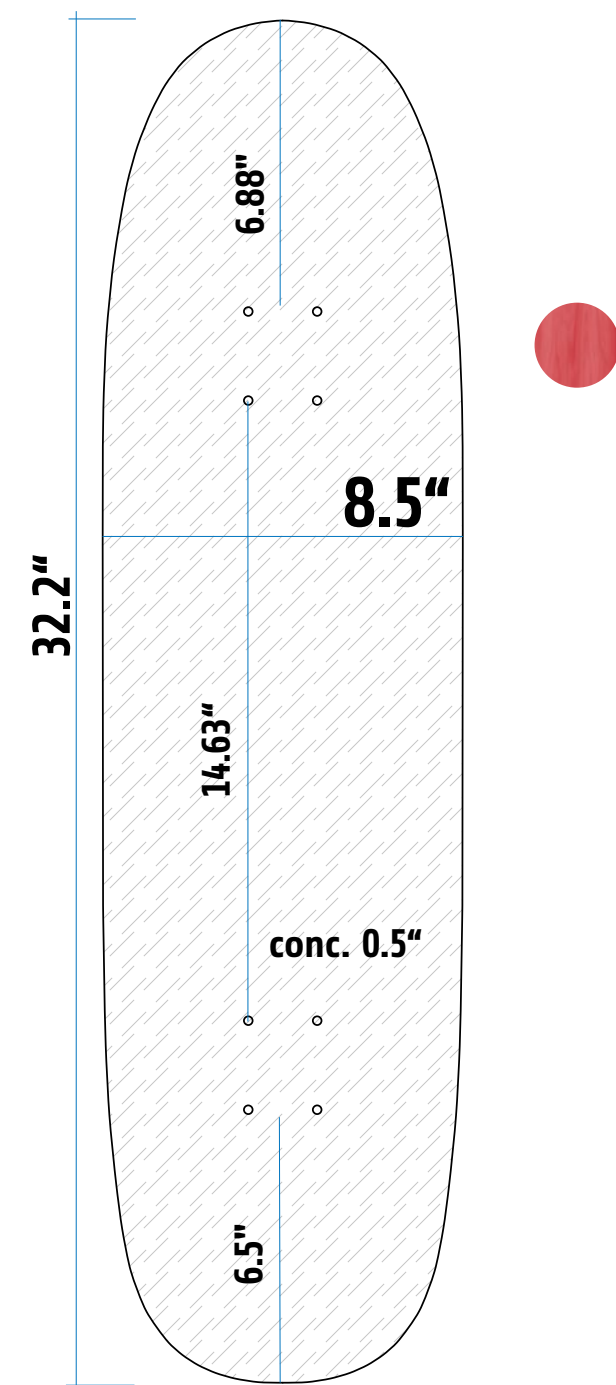

8.0 - 8.5"

Our new Square tail decks have a massive 7.25" nose and a squary tail for plenty of space to stand on. It also has a tub concave for a less exhausting stand of the feet. The medium sized kick radii provide a good stand in the pockets in every situation

Print Basics

Heat Transfer

Skateboard decks are printed with the Heat Transfer process. The designs are screen printed on a foil. After that the colors are transferred to the wood with heat and pressure.

CMYK

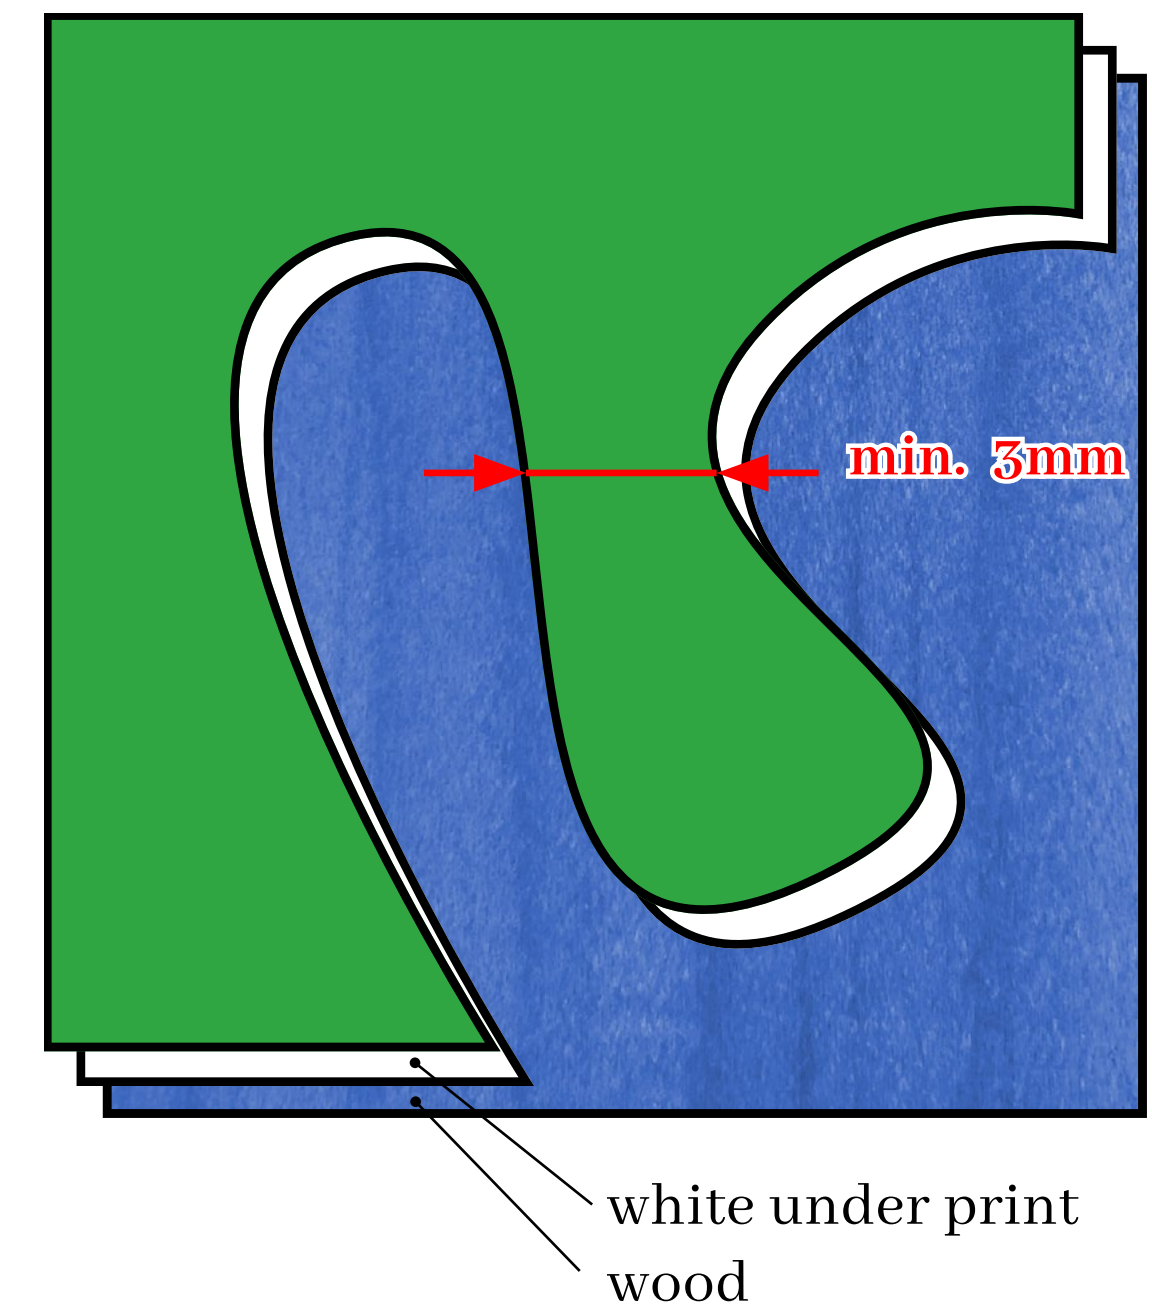

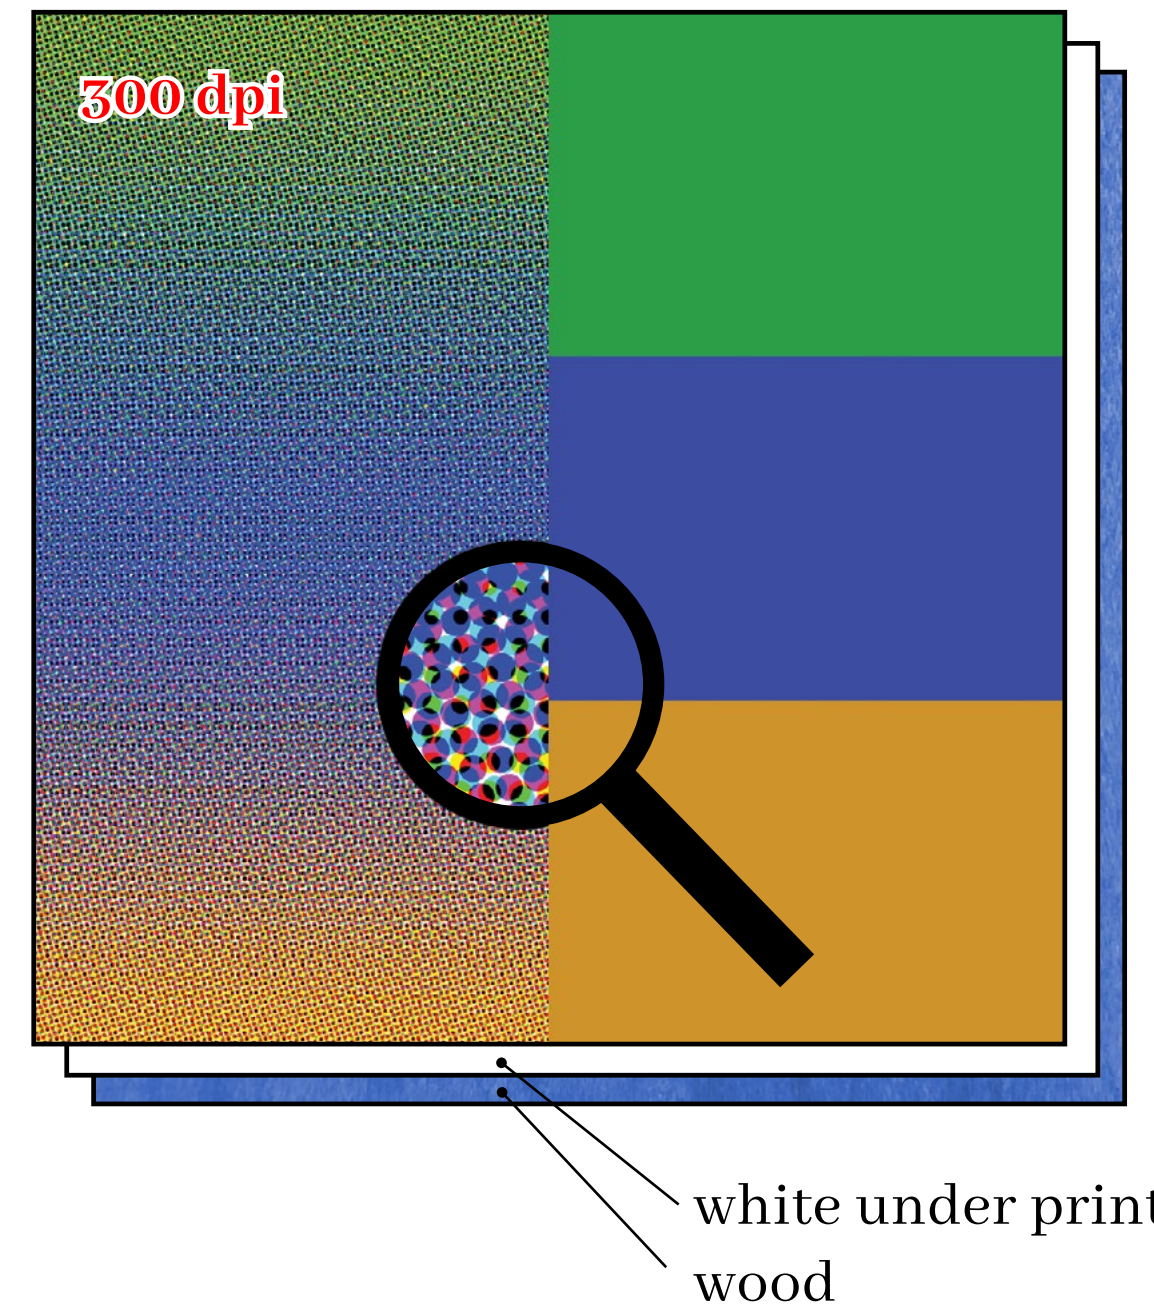

CMYK prints are made of the 4 Colors: Cyan, Magenta, Yellow and Black. Other colors and hues are generated from combinations of this four colors in a rasterizing process.

- used for color photos or
- designs with many different colors.

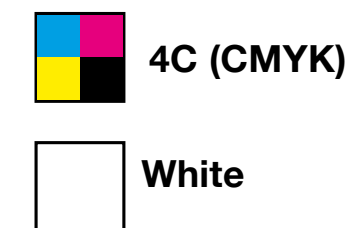

Spot Color

Spot Colors are pure colors. We use the Pantone Solid Coated color fan. This colors are used as pure colors and come out very clear. But you are restricted to the available color hues. A screen has to be made for each color. They can be rasterized too.

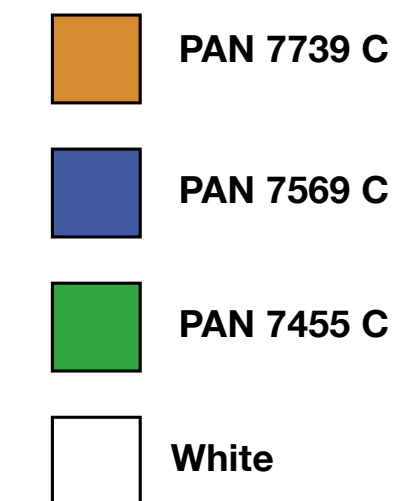

- used for designs with few distinct colors (mostly vector graphics)

Colors: 4

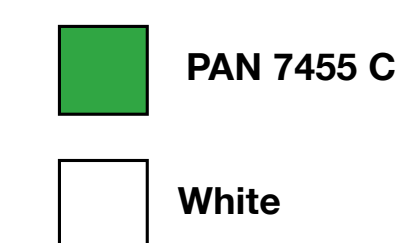

Colors: 3

resolution: 300 dpi
(9" x 33" = 2700 x 9900 px)

Colors: 2

minimum line width:
3mm (8,5 pt)

Transparency

At designs with transparencies the white under print is billed like an extra color.

At full prints the white under print (ground coating) is not billed as a color.
