

THE ORIGINAL KIDS BOARD - SUMMER 2024

NEW SHAPE

NEW SHAPE – MORE FUN!

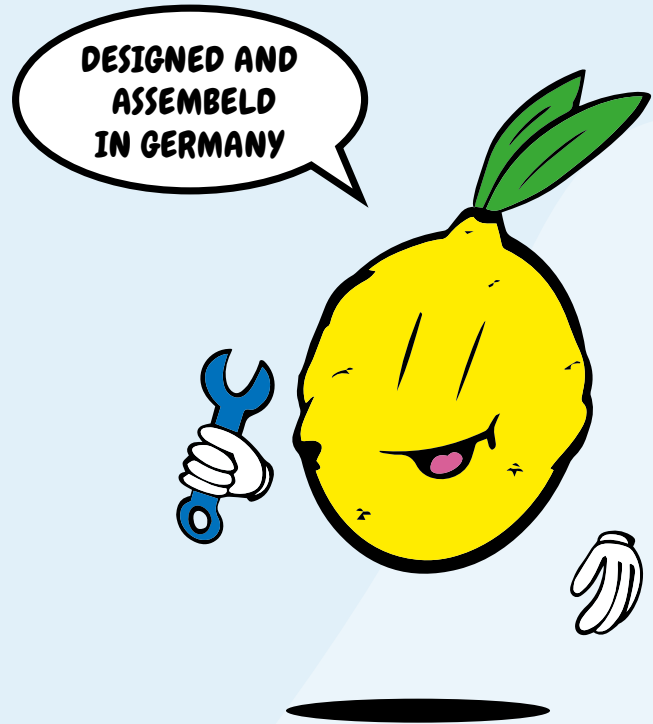

Why Did We Change the Shape of the Board?

We decided to change the shape of the board to provide more space for the younger skaters. The tail and nose of the previous design were particularly small, which limited their maneuverability and comfort.

In rethinking the design, we drew inspiration from classic decks of the early 90s. Our goal was to create a bridge between old school boards and modern popsicle shapes. This new design is not only visually appealing but also offers ample space for the new generation of skaters.

By combining elements from the past with modern requirements, we believe the new shape will enhance the skating experience, offering more versatility and comfort for everyone.
